Warning

ELECTRICAL SHOCK HAZARD: Turn off power at the main service panel by removing the fuse or switching the appropriate circuit breaker to the off position before removing or installing any thermostat.

Warning

This thermostat must be installed only by a professional contractor familiar with air conditioning and heating systems controls and wiring.
Install only on 24V AC control systems

INTEGRATED COMFORT SOLUTIONS™

ELECTRIC GAS

**7 Day Programmable
1 Heat / 1 Cool**

Intelligent Comfort Control

The 9700 has your comfort in mind. Our programmable thermostat is loaded with intelligent features, providing the ultimate choice in flexibility. **Customize your surroundings.** In QuickSet™ mode, set seven daily programs for summer and winter all at once. Choose Auto Changeover, and the thermostat will automatically switch to heat or cool, keeping you comfortable year-round. These intelligent features enable you to control your comfort level and reduce energy costs up to 25%.

The 9700 is compatible with all standard 24 Volt AC single-stage heat / cool systems.

When you select a Robertshaw thermostat, you've made the choice of an industry partner that's been making quality products for 100 years. Come home to affordable comfort. Come home to Robertshaw®.

Features and Benefits

NiteView™ Backlight Display

Backlight display can be easily activated by pressing buttons or convenient light bar.

Auto Changeover

Automatically switches into heat or cool mode.
Prevents having to manually change system from heat to cool.

7 Day Programming

Seven separate daily programs with four time and temperature changes per day allow maximum flexibility.

QuickSet™

Allows 7 days to be programmed all at once.

Automatic Compressor Short Cycle Protection

A system safeguard. Reduces wear and tear of HVAC equipment.

Remote Sensor Capable

Remote sensor capable — averages up to 4 sensor inputs (including main). Remote sensors are available separately as model 9015.

Temporary Program Override

Allows for manual temperature adjustment.

Adjustable Temperature Differential

Maintains optimal customer comfort.

Quick Wire Terminal Block

Fast and easy installation. Uses sturdy wire clamps — no wrap-around of screws.

Filter Monitor

Indicates when filter needs to be cleaned or replaced.

Programmable Fan

Energy cost savings. Allows user to set and provide circulation for optimal comfort.

Low Temperature Protection

Heat automatically turns on when temperature goes below 40°F. Protects pipes from freezing.

Allows for manual temperature adjustment.

Programmable Keypad Lock

Eliminates tampering. Keeps others from changing desired program.

Toll-Free Assistance

Toll-Free Technical Service number printed right on the thermostat provides immediate assistance.

below 40°F. Protects pipes from freezing.

Specifications

Electrical rating: 24 Volt AC (18-30 VAC)
1.5 amp maximum load per terminal (relay outputs)
3 amp total maximum load (all terminals combined)
Temperature control range: 45°-90°F (7°-32°C)
Accuracy: ±1.5°F (±0.2°C)
Auto-changover deadband: Selectable 3° or 5°F
DC power: 3.0 Volt DC (14.7 VAA alkaline batteries included)
Temporary temperature override: 4 hour maximum or next setpoint
Remote sensor capable: averages up to 4 sensor inputs
(3 remote plus main sensor)
System configurations: Single stage gas, oil, or electric heating/cooling systems (including single stage heat pump systems)

Other Single Stage Heat / Cool Thermostats

Architectural / Engineering Specification

The thermostat shall be a Robertshaw Model 9700 or equivalent. The thermostat shall have seven-day programmability with up to 4 time/temperature changes per day. The thermostat will allow temporary temperature override for a maximum of 4 hours or the next setpoint time, whichever occurs first. The thermostat shall allow the user to program the system fan separately for continuous or automatic operation for each of the 4 time setpoints per day to meet local application and code requirements.

It shall be capable of operating with standard 24 VAC gas, oil or electric heating and/or heating/cooling systems including single stage heat pumps. The thermostat will have an electrical rating of 1.5 amp maximum load per terminal, 4 amp total maximum load for all terminals combined. The thermostat shall have relay outputs compatible with standard 24 VAC control circuits and have battery back-up to prevent loss of programming in memory during power outages. The battery back-up circuit shall maintain all user programming for at least three months.

to prevent loss of programming in memory during power outages. The battery back-up circuit shall maintain all user programming for at least three months.

The thermostat will have automatic changeover capability to allow the thermostat to determine whether the heating or cooling program should be used to control the room temperature.

The keypad shall have a programmable keypad lock to prevent tampering with the user program. The thermostat shall provide a backlit display for easy nighttime viewing. The thermostat will provide remote sensor capability for up to four temperature sensors (including main thermostat sensor). The thermostat shall be equipped with a filter monitor. The thermostat shall be equipped with a five-minute delay on break for compressor short cycle protection during cooling operation to prevent compressor damage.
